## HOW IT WORKS

---

### 1. Decide on a subject

Look back on your beautiful life and pick one area to document in this book. It could be a year, a special event, or a travel experience. The possibilities are endless!

### 2. Gather the photos

Simply collect the photos of the chosen subject in one place. You can either select the specific photos you'd like to be in the book or you can send everything and let me do the curating.

### 3. Share the photos

We can either create a shared [iCloud album](#), or [Google shared album](#), or even a [Dropbox folder](#). I will work with you to make this as easy as possible.

### 4. Sit back and relax

Let me build you something lovely!

### 5. Make adjustments and add captions

Once the first draft is delivered, you use an easy online review app to leave any comments about changes to layouts or photo choices. You can also write as many captions as you'd like to help you better preserve the memories being captured.

### 6. Enjoy your physical collection of memories for years to come!

A beautiful, bound book will be delivered to your door. You can even order multiple copies to give as gifts or pass on to children.
